POSTAL REGULATORY COMMISSION

COMMENTS ON N2021-1

I would like to oppose Postmaster General DeJoy's proposal to degrade U.S. postal service.

I believe the U.S. mail should be delivered as quickly and efficiently as possible. To this end the U.S. Postal Service should be fully staffed, and employees should be allowed to work as much overtime as is necessary. U.S. mail should be transported by air, when appropriate. Sorting machines and other technologies should be retained and modernized, or purchased anew. The U.S. mail should not be privatized nor outsourced. Post offices should not be closed, nor should their hours of operation be reduced. Postal drop boxes should be made readily available to all communities.

The USPS should be fully funded, in order for it to perform its Constitutionally stipulated duties.

SINCERELY,

RANDY M. ROBERTS, PH.D.
